- The machine is Turbine/Generator and Turbine Shredder.
- Some didn't have any vibration protection systems, some has an existing system which is Shinakawa with only in some locations.
- The customers need to monitor and protect whole Turbine locations as well.
- The new system from Shinakawa or Bently Nevada has a very high cost, so it makes them no progress to improve this system in the past till they know AST.
- AST awarded to replace some failed existing system as well as installing a new system for whole Turbine locations.
- The new system is SENSONICS System which is much cheaper than any vendors they can find and trust.
