

3 in 1 sensor

- Cuts costs with **3-in-1** sensor
- Long signal distances

– The current line drive amplifier contained in the sensor allows signal conduction over distances up to **500 meters / 1640 feet with practically no signal loss at all.** (*Much lower high frequency loss in very long cables even over 1 km*)

– High shock resistance

– TANDEM-PIEZO[®] Accelerometers (Built-in 'Current LineDrive' amplifier)
