

VIBROTECTOR®

Effective machine protection

VIBROTECTOR® is the ideal vibration monitor for all machines which run under approximately constant operating conditions such as, e.g.:

- Fans
- Ventilators
- Pumps
- Electric motors

VIBROTECTOR® records broadband machine vibrations and transfers the resulting overall value as a current signal (4-20 mA) to the connected process control system. This value is compared with specified alarm thresholds and an alarm issued to the operating personnel if a value is exceeded.

10 great reasons for vibration monitoring with VIBROTECTOR®

- ⊙ Continuous vibration monitoring
- ⊙ Direct alarm notification in the control system
- ⊙ Simple to mount on the machine
- ⊙ Low installation costs
- ⊙ No additional hardware required
- ⊙ No additional supply voltage required
- ⊙ Robust compact design
- ⊙ 4-20mA output
- ⊙ Conforms to ISO 10816-3
- ⊙ Ideal for OEMs
